

Fact Sheet – Doctolib Connect

Doctolib B.V.

Keizersgracht 585

1017 DR Amsterdam

pr-connect@doctolib.com

Company Overview

Siilo, founded in 2016 by Joost Bruggeman (CEO) and Arvind Rao (CFO), is a secure messaging application for healthcare professionals. In 2023, it was acquired by Doctolib, a leading European digital health company, and integrated into its platform under the name Doctolib Connect.

Doctolib Connect aligns with Doctolib's vision of improving the daily work of healthcare professionals through modern technologies. The platform facilitates access to care, simplifies health management, and promotes prevention and continuous follow-up. It helps healthcare professionals collaborate efficiently, make faster decisions, and optimise patient care.

Product Overview - Doctolib Connect

Doctolib Connect is a secure medical messaging application that enables communication and collaboration between healthcare professionals within their trusted network, regardless of location. Today, it is the largest medical network in Europe, with more than 1.2 million members who have exchanged over 1 billion messages.

Doctolib Connect is available free of charge for individual users and teams. The secure messaging platform allows users to exchange messages, documents, images, and videos, as well as make voice or video calls, all while meeting the highest security and compliance standards in healthcare.

Connect for Organisations

This complementary service is designed for hospitals, healthcare organisations, and medical associations. With Connect for Organisations, these entities gain access to a closed member directory, shared discussion spaces, and the ability to broadcast messages. This ensures that their care teams remain informed, connected, and compliant with regulatory requirements.

Clients and Key Markets

Doctolib Connect is the largest network of healthcare professionals in Europe, with over 1 million members.

The main markets are the Netherlands, Germany, Belgium, the United Kingdom, and Ireland. The platform is used by internationally renowned institutions such as Erasmus MC Rotterdam (Netherlands), St. John & St. Elisabeth Hospital (United Kingdom), Mater Misericordiae University Hospital (Ireland), University Hospital Antwerp (Belgium), as well as professional associations such as the German Society of Cardiology and the Royal Dutch Pharmacists Association (KNMP).
